### A. Academic CV

This should be no longer than five pages and should include the following: 1) your projected date of graduation and your final degree; and 2) a list of academic accomplishments, including presentations, publications, exhibits, and teaching assignments.

### B. Responses to the three questions below

The length of each response is indicated below.

#### 1) EXPERIENCE:

What is your past involvement as a student, teacher, and/or scholar with publicly engaged scholarship, volunteerism, service learning, or community activism (see definition below)? What skills have you built in these areas? (**max. 500 words**)

#### 2) CURRENT VISION AND SUSTAINABILITY (max. 750 words):

For this part of the application, you have a choice between Option A and Option B (specify in your response). Choose only one with a word limit of 750 words.

**Option A:** Describe a project that you would like to develop further that involves public scholarship or community engagement. This project can be in any stage – from the spark of an idea to a program that is already in place and on which you would like to build. How can participation in this program help you move the project further? How can this project forge interdisciplinary scholarship and cooperation? We would like to hear what excites you and where you can imagine applying the methodologies of this program.

**Option B:** Is there a community-based group or agency that you would like to partner with to develop a project for GCSP? What is the name of the group/organization? Do you currently have a relationship with this group/agency? Why would you like to work with this group/agency? Describe a project that you would like to develop that involves public scholarship or community engagement with this group/agency. We would like to hear what excites you about possibly working with this group or agency and how you hope to enhance your skills through such a project.

#### 3) PERSPECTIVE:

How does your background, scholarly training, and/or life experiences relate to your interests in publicly engaged scholarship? How would your participation in this program advance your own scholarly development? We are particularly interested in the unique and diverse perspective you would bring to the program. (**max. 500 words**)

## Definition of Public Scholarship

It may prove useful to you and those writing letters on your behalf to consider this definition of public scholarship from Imagining America (<http://imaginingamerica.org/>):

- *Public scholarship is scholarly or creative work integral to a [faculty member’s] academic area. It is jointly planned, carried out, and reflected on by co-equal university and community partners. And it yields one or more public good products.*
- *Public good products may take diverse and plural forms, including but not limited to the following: peer reviewed individual or co-authored publications; presentations at academic and non-academic conferences and meetings; oral histories or ethnographies; interviews with or reflections by participants; program development; performances, exhibitions, installations, murals, or festivals; new K-16 curriculum, site designs or plans for “cultural corridors,” and other place-making work; and policy recommendations.*
